

# PUTTING THINKING

# FIRST:

# NAVIGATING THE AI SHIFT IN THE CLASSROOM

The era of Artificial Intelligence is here, and it's changing the "how" of education faster than ever. But while the tools are new, our priority remains the same: cultivating deep, critical thinkers.

This workshop is designed to move beyond the hype and help you harness the power of generative AI without sacrificing academic integrity or student agency. We'll explore how to transform AI from a potential shortcut into a powerful thinking partner that enhances the learning process.
